solar energy use for refrigeration buildings. To achieve a reduction in the proportion of gases consumed in this sector, the approach is becoming increasingly important. Estimates provided by the International Energy Agency (IEA) have gradually increased for many years, although they do not yet planned that photovoltaic technology (PV) really be used for air of its forecasts [2]. The current value of future cash payments when discounts of 6% were applied to the calculations for the combined use of VP and air conditioning was around \$ 9,745,000, while the solar refrigeration system will not reach the Breaking point in negative \$ 1,730,000. The refrigeration capacity of construction C is equal to 0.7 MW and the H2O-Libry proportion was intended to be approximately 10% of the general refrigeration capacity. Recent data indicate that the cost of electricity generated by PV technology could decrease to \$ 0.048/kWh by 2020 [50]. The original cost of the PV system and the air conditioning units was approximately £ 3m and has saved around (less maintenance and cleaning (5k)); the expected life for the PV system is about 20 years and the interest rate for this calculation was 6% per year without ransom value for the system##### 272' 852 ,68 ,8102 .sAap le ne adavele ralos n'Aicaidar al noc ednicioc otneimairfne ed amix;Am adnamed al .s;AmedA .ravoneR rodaregirifeR .ralos aAgrene al y soudiser sol ed rolac led osu neub nu rechad ed etneicife amrof anu .n'Acicrosa ed n'AicaregirifeR .GR ,arievilO^o;Z.R ,gnaW JfeRssorC| JralohcS elgooG| JralohcS elgooG|.8102 ne elbavoner aAgrene ed n'Acireeneg ed sotsoc .ralos n'Acirobna ed otneimairfne ed sametsis sol ed oz;Aesid ed senoicpo saveun sal y n'Aicagitsevni al arap n'Asiver anU .Z.R ,gnaW ;Y ,iL^o ;.M ,uQ ;.Q.X ,lahZ JfeRssorC| JralohcS elgooG| n'Aiacilpa .aziuS ,aelisaB ,JpDM ed oirataincelL .lonhceT .16' 74 ,9 ,5102 .O-.A.M ,J.M ,n'Aicide y n'AsiveR' arutircsE ;.A.A ,lanigiro tfarD' dneibircsE ;.A.A ,n'AicadilaV ;.A.A ,aAgolodoteM ;.A.A ,lamrof sisis|;AnA .ralos aAgrene ed n'Accelocer y otneimairfne ed saAgoloncet ed selbitfac senoicamaglarna 52 saduilcni .ralos otneimairfne led acim'Anoce y acinc@At n'Aicagitsevni asnetxe anu 'Azilaer eS .senoiger setneretid ne ralos otneimairfne ed seuqofne ed sopit setneretid ed n'Aicaulave al ne nartnec es sodaicosa sohidtuse sol ,saciatilovotof saAgoloncet sal y odanoicidnoca eria le ne solloranza sol natnerfne odnauc daditvitepmoc al renetnam arap saAgoloncet selat erbos n'Asisep al natnemua ralos ocimr@At otneimairfne ed sametsis sol ed daditlitaiv al y daditlitarp al y odicuder POC le ,otneiminetnam ed sedadisecen sasnetxe sal a odagerGA .9063 01 .8102 daditlibinetsO .n'Acicrosa y n'Acicrobna ed serodairfne nacilpmi sodarree sossocrp sol .|33,23| soduilcni .setnacesed sadeur odacilpa nah sorto eug sartneim .|13,03| soduilcni .setnacesed sovitorpave otneimairfne ed sametsis sol a soditqAl setnacesed noracilpa es eug sol ne sohidtuse odazilaer nah serodagitsevni soiraV .n'Aicagitsevni al ne avitacifingis n'Aicneta anu 'Abiccer on .ralos ocitrc@Ale otneimairfne led ocicfeneb le ratnemua ed laicnetop le eneit eug ,etnedexce aciatilovotof dadicirctele al ed n'Acinatnemila ed afirat al ,ograbme nIS .|8| ne ne |Atse eug 2OC ed senoismo ed Levin le ne n'Acuinimsid anu a eluviuge otsE .|63,53| sadicuder n'Accelocer ed sarutarepmet a otneimairfne rattsinimda arap radizitu eadup es C 'A 06 ed rodeberla ed rolac le y 56.0 ed rodeberla ed nos ametsis led POC ed serolav With the annual eloquent energy savings made in relation to heating, ventilation and air conditioning (HVAC) [28]. [Google Scholar] [Crossref] Halon, T., Pelinska-Olko, E., Szc, M.; Zajaczkowski, B. Management of the response to demand by controlled heat pumps through real -time pricing. [Google Scholar] [Crossref] Fong, K.F.; Chow, T.T.; Lee, C.K.; Lin, Z.; Chan, L.S. Comparative study of different solar cooling systems for buildings in the subtropical city. Figure 6. Energy. Alex Each module possessed eighteen tubes collectors (evacuated) containing multiple parabolic collectors. The energy storage system load occurs when photovoltaic technology generates excess energy, while it is in a discharged condition when the levels of solar radiation are reduced. [Google Scholar] [Crossref] Klein, A.; Beckman, A.; Mitchell, W.; Duffie, A.; Duffie, N.; Freeman, T. The year predicts that by 2050, photovoltaic technology will produce 4.7 terawatts according to its high renewable energy scenario, where more than 50% will be implemented in India and China, which makes the Solar energy of energy in the main one. world. [Google Scholar] [Crossref] Calm, J.M. The emissions and environmental impacts of air conditioning and refrigeration systems. Related studies are concentrated in control strategies that are capable of softening the generation of PV [11], increasing profitability [12] and improving technical comfort within buildings [13]. Many studies indicate that the use of these measures could save up to 50% of the cooling energy [41,42,43]. Similar to the majority of other countries, it is anticipated that the need for air conditioning in Jordan will double for 2030 levels of 2015 [44]. [Google Scholar] [Crossref] Henning, H.-M.; Dägll, J., the systems they are currently used generally do not have good energy efficiency, experience more leaks and release substances that damage the climate and ozone to the atmosphere. 2009, 13, Therefore, approximately 5% of all installed refrigerators must be replaced annually. The growing demand for compression refrigerators in Jordan provides an opportunity to stop using older cooling systems and move to more sustainable and ecological options. The benefit of the current value minus the expenses will be approximately \$7,455,450 throughout the project life. They are replacements for artificial refrigerants (chlorofluorocarbons (CFCs), hydrofluorocarbons (HFCs) and hydrochlorofluorocarbons (HCFCs) [47]. Both the seasonal coefficient of performance value (SCOP) for heating and the value of the seasonal energy efficiency ratio (SEER) for cooling reflect the actual amount of energy consumed by a heat pump. Available online: (accessed on 5 March 2020). Alrwasheh, S.S.; Alsarireh, F.M.; Saraireh, M.A. Solar radiation map of Jordan governorates. Internal rate of return (IRR) for different cooling systems. Consequently, there will be a drastic increase in emissions, which will contribute back to climate change. Sustainable refrigeration technologies that are fueled by renewable energy sources and organic refrigeration liquids are becoming increasingly popular. In its current form, solar cooling predominantly includes the cooling of solar PV mechanical compression and the cooling of feeding steam compression [3,4] by solar absorption [5,6,7] and cooling of solar desiccation [8]. In cooling adsorption systems, the coolant is adsorbed using a solid. The field of solar collectors located on the roof of building C is shown in Figure 4 [49]. The water was supplied at a temperature of 85 °C to the absorption refrigerator, which sotsse eD .982 ,021 ,8991 .satsinoiceloc sol rop sodareneg hWk 000.052 sol ed n'Acicrobna ed rodairfne le arap acimr@At aAgrene ed hWk 000.44 a laugi options, the power for solar electric compression cooling systems is provided by PV technology, where such systems can either be connected to utility grids or stand alone. When the system is operating at a maximum COP of 0.79 (under standard test conditions) and the actual recorded COP of 0.32 on the site, the respective LCOE values were \$0.39/kWh and \$2.35/kWh. In this study, we assumed the electricity tariffs based on total demand (not peak demand) were fixed at \$0.1/kWh, as such, it is clear that the absorption chiller does not have economic feasibility [49].As the initial cost for installing the solar thermal cooling system on one building was \$350k, the cost will rise to \$3.150M if it is installed on 9 buildings throughout the campus, while the initial cost for the central air conditioning and PV system is \$3M. 2015, 107, 84eAAA92. [Google Scholar]Kalkan, N., Young, E.A.; Celiktas, A. [Google Scholar] [CrossRef]Choudhury, B., Saha, B.B.; Chatterjee, P.K.; Sarkar, J.P. An Overview of Developments in Adsorption Refrigeration Systems towards a Sustainable Way of Cooling. [Google Scholar] [CrossRef]Albatayneh, A.; Alterman, D.; Page, A.; Moghtaderi, B. All the above-mentioned plans add to the formation of shaded zones for pedestrians and vehicles, while also enhancing the aesthetic quality of the campus. It is expected that commercial chillers will have a lifetime of around 20 years. These types of systems are predominantly utilised for larger cooling capabilities and the COP values achieved range from 1.1eAAA1.2. They generally require operative temperatures in excess of 140 aAgrene aL .ametsis led sabmoy y serodalitnev sol ricudnoc arap additem nary ne se acimr@At ralos n'Aicaregirifer ed sametsis ne railixna dadicirctele ed omusnoc IE .labogh otneimairfneac le rop odasuaac ocit;Amilc oibamac led ameliborp le radbroa y sacitrc@Ale seder sal ed aAgrene ed saicnegixe sadavele sal ricuder a etnemavitacifingis riubirtnoc aArđop n'Aicaregirifer noc ralos aAgrene ed otneimalpoca IE .litvA adiv usu etnarud ametsis le renetnam y rarepo la sodirrucci sotsoc soseravid sol ed esab al erbos 'Animreted es JM y O' otneiminetnam y otneimanoicnu ed sotsag ed ejatnecrop IE .sonaliartsua sanicifo ed soicifide arap ralos odanoicidnoca eria ed sametsis setneretid ed n'Acirapmoc .acit@Agrene y acim'Anoce n'Acicavresnoc ed savitcepsrep sal edsed soicifide ne n'Acicilpa ed asemorp royam arteum ociatilovotof ropav ed n'Asisepmoc ed otneimairfne le .ralos n'Aicaregirifer ed sopit setneretid sol edsed eug riced edeup es .seroiiretna sohidtuse n'AgeS .|04| laidnum Levin a n'Acicaregirifer ed sametsis 0531 ed rodeberla odalatsni naBah es o'As. 5102 ed selamif ed sacitc;Adatse sal n'AgeS ,ograbme nIS ,ainadro| ne ralos n'Aicaregirifer ed laicnetop le erbos oidutsEa|C|CS| ocirecmoc le y airtsudni al arap evnaus otneimairfneJfeRssorC| JralohcS elgooG| E .,sokanafeTS ,Y.D .,imawsoG .,M .,imabhgyeZJfeRssorC| JralohcS elgooG| .selis'Af selbitsubmop roc adareneg dadicirctele al se adartsinimus aAgrene al ednod odanoicidnoca eria ed selanoicidart sametsis sol ruititsus aArđop euq ol .sodil;Ac samilc ne sadautis olloransed ne senoicah sahunc arap etneibma oidem le noc sasoutepser y selbatter savitanretla nareuf ralos n'Aicaregirifer ed sametsis sol eug 'Acifinalp es ,oipicnirp le edseD .h/3m 0004 edsed eria ed nemulov ed sojulif noc n'Acicaregirifer ed sametsis nis n'Acicaregirifer y odaces arap serodevorp ed s;Ameda ,soitavagem atсах Wk 5 edsed nav eug n'Aicaregirifer ed sadilas necerto acimr@At aAgrene rop sodatnemila etnemalaicremoc selbinopsid serodaregirifer soL .|93| It can become beneficial or air conditioning refrigeration (cooling and dehumidification) using various approaches.
